The 10th of May 2017

Round table: «Medical securing in the field of road traffic safety. Introduction of informative technologies»

Representatives of state authorities and local self-government, representatives of education branch and scientific institutions, enterprises of transport branch and transport management, international organizations, public and professional associations have taken part in the round table discussions.

Statistics of accident rate shocks on the roads of Ukraine!

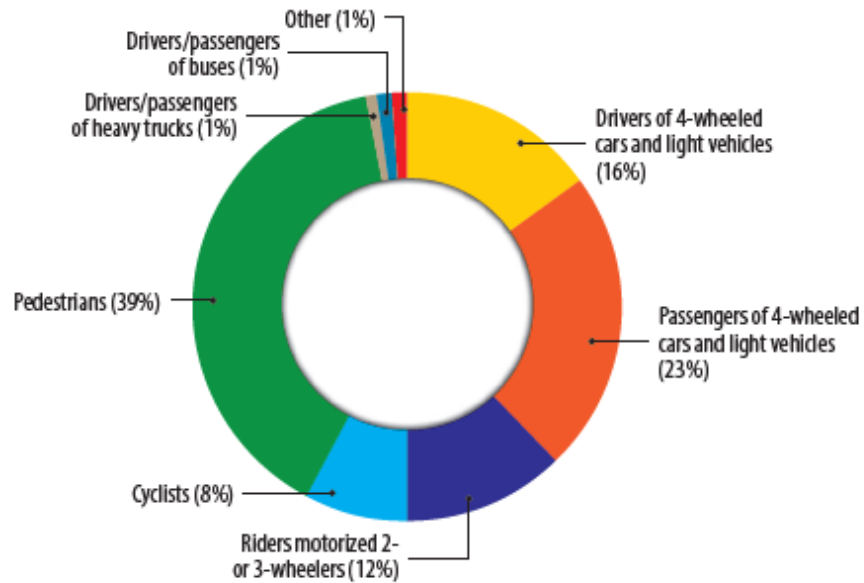

As of April 2017, 47 317 RTAs have been registered, 7 533 among them including human victims.

It is by 12,1% more comparing to the preceding year. Every 8th motor transport accident is accompanied by human victims, 906 of them having been lost and above 9 409 having been traumatized. The quantity of RTAs with the participation of public transport drivers has become twice higher.

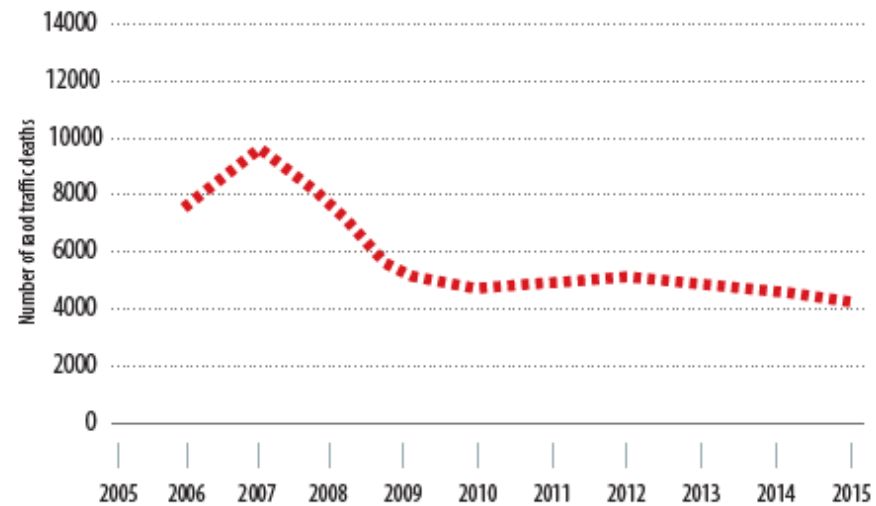

The RTAs with human victims are due also to unsatisfactory road state and technical means malfunctions. Last year 138 536 RTAs had place in Ukraine, 4 462 persons being perished. Therefore the carrying out of preventive actions aiming the decrease of mortality and accidente on our country's roads is of the greatest importance.

DEATHS BY ROAD USER CATEGORY

Source: 2015, State Statistics Service

TRENDS IN REPORTED RPAD TRAFFIC DEATHS

Source: State Statistics Service

The main RTA causes include excessive traffic speed as well as alcohol and narcotic substances use. Because of such situation, the carrying out of driver inspections by narcology and psychiatry specialists should become a system; a system of medical inspections of transporting drivers should be elaborated.

The 11th of May 2017

Scientific-practical conference:

«Vital problems of road traffic safety in Ukraine. Strategy and plan of actions. Safety of transport means and their exploitation»

During the conference, experts in these problems have discussed the main content of the Strategy aiming the increase of road traffic safety level and have elaborated the plan of actions for the period up to 2020.

Participants of the scientific-practical conference have concentrated their attention on problems of: state regulation in the field of road traffic safety and conditions of road traffic rules (RTR) observance, fixation of RTR violence in Ukraine, technical regulation concerning certification of apparatus and complexes of RTR automatic fixation, reformation of examination system necessary to obtain driver's rights according to the EC requirements etc.

The experts have discussed strategic problems concerning the increase of road traffic safety level in Ukraine.

Possibility of foreign experience introduction aiming to decrease motor road accidents. The attention has been concentrated on rate decrease by drivers.

The 11th of May 2017

Round-table has taken place in the Donetsk Juridical Institute of the Inner Ministry of Ukraine (IMU) concerning the theme «Live Issues of Legislation Improving in the Field of Road Traffic Safety»

Administrative and legislative problems have been discussed including:

- road traffic safety; state and public control of motor transport;
- improving of driver teaching system, their additional training and requirements concerning licensing for transport means driving;
- prevention of children traumatism due to road transport;
- medical guaranteeing of road traffic safety etc

The 11th of May 2017 All-Ukrainian action «Be a Donor - Save a Life!»

The action «Be a Donor - Save a Life!» has been carried out in all the regions of Ukraine, its aim being to draw the society's attention to road transport traumatism problems, especially among children! It has been a charity action: each volunteer had a possibility to give his/her blood for help to citizens having become RTA victims.

The action has been supported by:

Workers of the Department of Preventive Actions in the National Police of Ukraine, of the Department of Protective Police, of subordinated sub-departments of the Department of Protective Police in Kyiv-City, Office of the Road Traffic Safety in the Department of Preventive Actions.

A nation-wide action had place in Kyiv in the National Children Specialized Hospital «OKHMATDYT».

Severe RTA-due traumas, many surgical interventions lead to donor blood deficiency in Ukraine.
According to statistics data, every the forth citizen of Ukraine need donor's blood use.

The 12th of May 2017 року

Nation-wide action «Decrease the Rate and Save a Life!»

On the 12th of May, in frames of the UNO-initiated Forth Global Week of the Road Traffic Safety in Ukraine drivers of all regions have supported the world «Day of Decreased Rate», the rate acceleration having become one of the most important sources of RTA in Ukraine. The most frequent victims (43%) are pedestrians, cyclists, and motor-cyclists.
